22.13.将数组拍平.md 2024-03-26

## 将数组拍平

将数组[1, 2, [3, 4, [5, 6, [7, 8]]]]拍平。

- 1. 数组的 flat 方法
- 2. 递归判断数组的元素是不是数组
- 3. toString()

```
let arr1 = [1, 2, [3, 4, [5, 6, [7, 8]]]];
let arr2 = arr1.toString(); // '1,2,3,4,5,6,7,8'
let arr3 = arr2.split(','); // ['1', '2', '3', '4', '5', '6', '7', '8'];
let arr4 = arr3.map(item => Number(item)); // [1, 2, 3, 4, 5, 6, 7, 8];
```
